

Electrical Parts for Forklifts

Forklift Electrical Parts - Lift trucks along with various forklifts may have specific labels for use in some hazardous locations. The mark denotes that this certain model of forklift meets the minimum standards of ANSI/UL 553 utilized for electric lift trucks or ANSI/UL 558 utilized for internal combustion engine lift trucks.

The application for labels for lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance provider and Fire Marshall for additional information about the permitted uses of industrial powered forklifts in your application.

If the particular lift truck meets the outlined standards, labels could be put. A labeled forklift would show the type of designation located on the nameplate and would have a correctly corresponding label put.
